

CO-1 Home Assignment

1. Illustrate the process of the Autonomous Parking system and its core functionalities with a schematic diagram.
2. Explain the role of AI in improving decision-making for Lane Assist Keeping, Autonomous Emergency Braking AEB safety control in electric and autonomous vehicles.
3. Describe how a Blind Spot Monitoring (BSM) system detects vehicles in the driver's blind spots and alerts the driver. Explain its practical importance in preventing side collisions and improving overall road safety.
4. Describe the role of Machine Learning in autonomous vehicle ADAS applications with suitable use case.
5. Illustrate the steps to track the highways to assist the autonomous vehicle systems using vision-based technique in ADAS.
